EMS, PCBA, semiconductor, test and measurement, electronics manufacturing	Avionics, defense systems, cleared and non-cleared manufacturing and ops	Power transmission, precision machining, gear and drive systems, automation	Class II and III devices, QMS, supplier quality, ops and regulatory affairs

WHY ACCUCHAIN TALENT

Operator Background	Our founder spent 30 years inside global manufacturing before his first placement. We know what good looks like in your environment.
Passive Candidate Reach	We source beyond the job boards into passive talent networks, including cleared professionals not actively seeking.
Cleared Talent Access	Daniel Sexton held a Secret clearance during Navy service and at Lucas Aerospace Power Equipment. We understand cleared requirements and can source accordingly.
Niche Focus Only	We do not work outside Electronics, Defense and Aerospace, Industrial, and Medical Device. Deep specialization means faster, better fits.
Geography First	Every search starts with candidates who can actually show up. We do not waste your time on out-of-area talent who will not relocate.
